SASTANAK

MEETING

Dragi prijatelji,

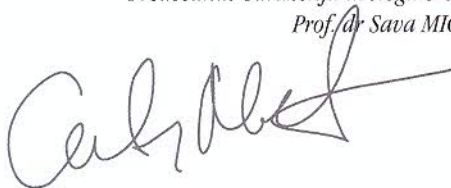

Beograd je, sa svojom istorijom starom 7000 godina, jedan od najstarijih evropskih gradova. Sve civilizacije su ovde ostavile svoje tragove, da ih istoričari proučavaju, nas da podučavaju. Naši stručni naponi su jedno zrno za tu istorijsku građevinu i mi ga sa zadovoljstvom postavljamo.

Sastanak Udružnja urologa Srbije je uvek višestruko zadovoljstvo: da izmenimo naša iskustva i da produbimo prijateljstva. Učešće kolega iz drugih zemalja obogaćuje i stručni sastanak i naše emocije. Ovaj sastanak ima posebnu privilegiju što će govoriti i Professor Per-Anders Abrahamsson, generalni sekretar Evropskog udruženja urologa.

Govorićemo o temama iz urologije koje, svojom ozbiljnošću, ali i sve većom učestalošću, svakodnevno zaokupljaju našu pažnju - o vidovima i uspesima lečenja karcinoma urogenitalnog trakta. Govorićemo i o urološkoj problematici koju je karcinom potisnuo iz prvog plana, ali joj nije oduzeo značaj u našim nastojanjima da je rešimo.

Ovo je prilika da vam uputim srdačnu dobrodošlicu za učešće na sastanku i za boravak u Beogradu!

Predsednik Udruženja urologa Srbije
Prof. dr Sava MIČIĆ

Dear friends,

Belgrade, with its history of over 7000 years, is one of the oldest European cities. All civilizations have left their imprint here, to be studied by historians, and to teach us. Our professional efforts are just a little grain in comparison to such historical construction and we plant it with utmost pleasure.

The meeting of the Serbian Urological Association is multiple pleasure: to exchange our experiences and make our friendship more profound. The participation of our colleagues coming from other countries enriches our meeting and emotions. This meeting is especially privileged by participation of Professor Per-Anders Abrahamsson, General Secretary to European Urological Association.

We shall address the subjects on urological issues, which by their seriousness and increasing frequency, attract our attention everyday – meaning, the aspects and success of treatment of the urogenital tract cancers. We shall also discuss about urological problems that have been pushed by cancer in the background, but not of secondary importance to us in our attempts to manage them.

This is an occasion for me to welcome you warmly here at the meeting and during your stay in Belgrade!

Professor Sava Micic, MD, PhD
President Serbian Urological Association
